

Sheet Pile Cutter

MACHINE INTRODUCTION

The Sheet Pile Cutter, developed by DCN Diving, is a powerful diamond wire cutting machine specifically designed for safe and precise seam cutting in steel sheet piling walls. Suitable for both above-water and underwater operations.

TECHNICAL SPECIFICATIONS

Machine weight
3000 kg

Frame
Positions and security clamps the machine on the sheet piling wall

Cutting carriage
Moves along the frame, carrying the diamond wire for cutting

Hydraulic Power Pack
Drives the cutting wire monitor with adjustable flow speed settings

Control Unit
Provides full control over wire travel speed, direction and real-time monitoring of machine functions
