Following are some selected projects but the list is not limited to (click here to visit our website for more info):

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT	
2026	Herbosch Kiere - Colloidal concrete Antwerp	Belgium	Quay	Inshore	Surface Supplied Diving	We carried out an underwater inspection of the seabed along the entire quay to check whether the cells were clear and free from unusual objects or obstructions. In addition, the surrounding area was inspected for any irregularities on the seabed, with debris and foreign objects removed where possible during the inspection works. Following the inspection, underwater colloidal concrete was poured as part of the completion works.	Herbosch Kiere	HERBOSCH-KIERE
2026	Cable Repair - second phase	United Kingdom	Offshore Cable	Offshore	Surface Supplied Diving	Surface Supplied Diving services onboard the Deep Cygnus for the repair of an offshore cable located in the English Channel, within the UK's 12 nautical mile zone. The diving operations include range of tasks, including the identification and exposure of the damaged cable, cutting the cable using a hydraulic remote cutter, installing the Chinese finger, and subsequently disconnecting the repaired cable from the spreader bar.	Travocean	TRAVOCEAN
2026	TM Edison - Concrete Pile Cutting	The Netherlands	Concrete Piles	Inshore	Subsea Technologies	DCN Diving carried out the cutting of concrete piles using our in-house engineered Diamond Wire Concrete Cutter. This tool uses a diamond wire saw to cut the pile free, after which it is secured by the tool's clamps and hoisted to the surface. This method enabled a precise and controlled cut, executed safely and efficiently.	TM Edison	DEME JAN DE NUL
2026	Dredging and Mattress installation	Baltic Sea	Offshore Cable	Offshore	Surface Supplied Diving	Remedial dredging activities and installing the final twelve (12) concrete mattresses nearshore crossing locations. These final mattresses are placed at each end of the crossing section.	Asso	asso.subsea

DCN Diving Company Reference List

Following are some selected projects but the list is not limited to (click here to visit our website for more info):

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT
2026	Cable Repair - first phase	United Kingdom	Offshore Cable	Offshore	Surface Supplied Diving	Surface Supplied Diving services onboard the Normand Jarstein for the repair of an offshore cable located in the English Channel, within the UK's 12 nautical mile zone. The diving operations include range of tasks, including the identification and exposure of the damaged cable, cutting the cable using a hydraulic remote cutter, installing the Chinese finger, and subsequently disconnecting the repaired cable from the spreader bar.	Travocean
2026	KrammerSluizen	The Netherlands	Sluice	Inshore	Surface Supplied Diving	Diving assistance was carried out for the removal of a sluice gate at the Slaak outfall structure of the Krammersluis. The works included cleaning the gate on the outside using water jetting, and where necessary removing silt by suction. The wedges were removed, after which the recess of the second gate on the inside was inspected and cleaned. From the inside, lifting arrangements were installed to enable the safe removal of the gate, followed by inspection activities during execution.	Besix
2025 - 2026	Immontec - Diving work on the Oosterweel link	Netherlands	Tunnel	Inshore	Surface Supplied Diving	DCN Diving contributed to the successful immersion of all eight tunnel elements of the Scheldt Tunnel, part of the Oosterweelverbinding project. Working in close collaboration with multiple project partners, we were responsible for inspection and guidance throughout the immersion operations. Despite challenging conditions and tight tolerances, this joint effort ensured that each tunnel element was installed safely and accurately.	Immontec
2025	VDS Construction pit Westdorpe	The Netherlands	Construction Pit	Inshore	Surface Supplied Diving	We carried out a shovel-clean inspection of the construction area to ensure all sections were properly cleared and prepared for the next phase of the works. In addition, a detailed seabed inspection was performed to verify the correct levels and check for any irregularities or remaining debris. The sheet pile wall was cleaned at the location of the underwater concrete works to ensure suitable conditions for the concrete connection, after which the underwater concrete was poured to complete the works.	Van der Straaten aannemingsmaatschappij B.V.

DCN Diving Company Reference List

Following are some selected projects but the list is not limited to (click here to visit our website for more info):

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT
2025	JDN - Sheet Pile Rehabilitation Guyana	Guyana	Quay wall	Inshore	Surface Supplied Diving	DCN Diving was contracted to support the remedial works by installing a cofferdam. This created a dry working environment, allowing the necessary repairs to be carried out safely and effectively below the waterline.	Jan de Nul 
2025	Arge Tunnel ElbX	Germany	Construction Pit	Inshore	Surface Supplied Diving	The works included cleaning the gate on the outside using water jetting, and where necessary removing silt by suction. The wedges were removed, after which the recess of the second gate on the inside was inspected and cleaned.	 
2025	TM Edison - Ballast Concrete Installation	The Netherlands	Caissons	Inshore	Surface Supplied Diving	Installation of ballast weight into caissons using underwater concrete	 
2025	Soetaert - Construction pit Sanovi	Belgium	Construction Pit	Inshore	Surface Supplied Diving	On behalf of Soetaert NV, diving operations were carried out for the preparation of a construction pit for a new production line for Sanovi in Geel. The works included shovel-clean and seabed inspections, cleaning of the walls for the underwater concrete works, installation of a gravel layer, and positioning of the anchor plates at the correct level. Following these preparations, the underwater concrete floor was poured.	 SOETAERT BUILDING ON SOLID GROUND
2025	Verapaz Bridge - Cutting of piles	Belgium	Piles	Inshore	Subsea Technologies	We carried out the cutting of piles using our in-house engineered abrasive cutter, designed to cut the piles from the inside out. The piles were first dredged out, allowing the abrasive cutter to be lowered into position. Once in place, the piles were cut with precision and control. The piles were then removed, completing the operation safely and efficiently.

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT
2025	Caisson guide installation	Netherlands	Platform	Offshore	Surface Supplied Diving	The project consisted of various subsea diving activities, including visual inspections, waterjet and brush cleaning, valve locked-open procedures, and construction works. All diving operations were performed from the F2-A Hanze Platform.	Dana Petroleum 
2025	Rheine, Rodde Lock	Germany	Construction Pit	Inshore	Surface Supplied Diving	Execution of underwater and civil works for two construction pits at a water depth of 12 m. Scope included cleaning 1,001 m ² of sheet pile wall (200 bar), sludge removal over 3,953 m ³ , and placement of 7,257 m ³ underwater concrete using a tremie system supported by a pontoon bridge. Additional works comprised sheet pile anchor welding and repairs, grouting works, sensor installation, support during GEWI anchor testing, and installation of 169 m of crack inducers.	Johann Bunte 
2025	Dana IRM Vessel Based	Dutch North Sea	Platform	Offshore	Surface Supplied Diving	DCN carried out a range of ROV inspection and maintenance activities on the P11-B De Ruyter TMLS. The scope included an as-found survey and hazard check, detailed visual inspections and CP surveys of the TMLS and associated subsea components, seabed scour surveys, and inspection of loading hoses, mooring line clump weights and fibre mooring assemblies. In addition, DCN performed a transponder stack exchange and carried out MLCW transponder maintenance, including cleaning of the latching mechanism and replacement of the transponder.	Dana Petroleum 
2025	De Roeck - Brussels Quay Renovation	Belgium	Quay	Inshore	Surface Supplied Diving	Pouring of 3,500 cubic meters of underwater concrete to underpin and stabilize a quay wall.	Heyrman - De Roeck 
2025	VanderVelde - BP Rotterdam Anode Installation	Netherlands	Sheet Pile wall	Inshore	Surface Supplied Diving	Scope included cleaning 1,001 m ² of sheet pile wall (200 bar), sludge removal over 3,953 m ³ , and placement of 7,257 m ³ underwater concrete using a tremie system supported by a pontoon	VanderVelde Protection BV / BP

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT	
2019 & 2020	Micro Habitat Development and Ninian South Platform Repair	United Kingdom	Platform	Offshore	Offshore SAT diving, Hyperbaric testing	Development of a patented Micro Habitat System including FAT and proven technology. Diver Welder and Welding Procedure qualifications in DCN's hyperbaric and wet test centre. Offshore campaign with the use of Sat Diving where 4 brace repair welds on Ninian South Platform were completed including NDT at a depth ranging from 43msw and 76msw.	CNRI	
2019-2020	Hail and Ghasha Artificial Islands Construction Project	UAE	Jetty and Breakwater	Offshore	Surface Supplied Diving	The project consists of construction of eleven (11) artificial islands in Hail and Gasha fields, Butinah Jetty, Butinah Centre Building and navigation channels that provide safe access to the these islands.	NMDC	
2019-2020	Munich Airport	Germany	Tunnel	Inshore	Surface Supplied Diving	Diving support for the installation of a new rail- way tunnel. Activities included removal of concrete barrier with Ultra-HP Waterjetting of 2500 Bar, underwater concreting, other supporting activities. The railway will connect Freising and Erding via Munich Airport.	Ballast Nedam	
2019-2020	Expansion of Södertälje Sluice	Sweden	Sluice	Inshore	Surface Supplied Diving	Dive Supporting activities including, underwater inspection, wet welding, removal of subsea parts of previous sluice, underwater concreting and other supporting activities for the expansion of the Södertälje sluice.	Ballast Nedam	
2019	COES 5 Pipelines Replacement Berri Field	Kingdom of Saudi Arabia	Pipeline	Offshore	Surface Supplied Diving	Diving support for Demolition of Pipelines, Spools, existing Risers and Riser Guards. Laying concrete mattress and Grout Bags for pipeline crossings. Installation of new Risers and Riser Guards, Spools and associated Flange Shrouds. Free Span Correction of New Pipelines and Precommissioning.	COOEC / Dynamic Industries / Saudi Aramco	
2019	Cruiseterminal	Belgium	Quay	Inshore	Surface Supplied Diving	Design and fabrication of a purpose-built cofferdam in order to rehabilitate the quay wall of the cruise terminal in Antwerp.	Artes Roegiers

2019	Flexlay and UWILD Campaign	Malaysia	PFLNG SATU	Offshore	SAT diving, Surface Supplied Diving	Installation of flexible pipelines and UWILD (Underwater Inspection in Lieu of Dry Docking) on PFLNG SATU	Del Sol	
2018 - 2019	Sur de Texas Pipeline Project	Mexico	Pipeline and Conductors	Offshore	Surface Supplied Diving and Survey Support	Dive and Survey support from our Zwerper 3 Multicat consisting of IBU, MBU installation and removal, spool-piece installations, pre-commissioning support (pigging, hydrotesting), Laydown and Recovery, pre and post lay surveys, conductor sealing and grouting.	Allseas	
2019	Borkum West ICCP Anode Repair	Germany	Monopile	Offshore	Surface Supplied Diving	Wet Welding ICCP Anode Repair Project with the VOS Sugar. Prior to the offshore phase, wet welding trials were conducted in the Netherlands in order to qualify the Welding procedure and the Diver Welders	Seaway7	
2018	HFG Helwin 2 Shim Repair	Germany	Offshore Platform	Offshore	ROV, Survey, TUP Diving	ROV, Survey operations, dredging around piles and installation of wedges to prevent movement of (Helwin 2) platform on piles. Platform operated by TenneT	Heerema Fabrication/ Tennet	
2018	KKS PLEM Replacement Hyperbaric Pup-Piece Tie-In	Netherlands Japan	Pipeline	Offshore	SAT diving, Hyperbaric testing	Qualifications of WQT and WPQT, Hyperbaric Welding of Pup-piece to an Existing Pipeline in Tokyo Bay Japan	Fugro/NSENGI	
2018	Sat diving services SBM Fujairah	United Arab Emirates	CALM Buoy PLEM	Offshore	SAT diving	Subsea hose change out SBM	ADNOC	
2017	Boulogne Sur Mer	France	Canal's Lock	Inshore	Surface Supplied Diving	Rehabilitation of railway of canal's lock door and lintel beam refurbishment with the use of a habitat system.	Artes Depret	

DCN Diving Company Reference List

Following are some selected projects but the list is not limited to (click here to visit our website for more info):

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT
2018	Dana F2A Hanze 2018 IRM	the Netherlands	Offshore Platform	Offshore	Surface Supplied Diving	Subsea Inspection Repair and Maintenance on the Dana F2A Hanze Platform	Dana Petroleum 
2017	TIWAG Gepatsch Speicher Dredging and Saturation Project	Austria	Dam	Hydro Power Dam	SAT Diving	Dredging of sediment with airlift dredger at 100 m dept in order to conduct Sat Works. Rehabilitation of intake trash racks with the use of Sat Divers and underwater concrete pouring at 100 + m depth	TIWAG 
						For more info please click here	
2017	DSV Supply Sawerak Waters	Malaysia	Offshore Platform	Offshore	Sat + Surface Supplied Diving	Metrology on spools and installation of spool pieces	Petronas 
2017	Valve Replacement	Portugal	CALM Buoy PLEM	Offshore	Surface Supplied Diving	Replacement of wo malfunctioning remote operated 24inch Subsea Valves	Galp 
2017	Lan-Tay Platform	Vietnam	Offshore Platform	Offshore	SAT diving, ROV Works	EHFL Replacement, LIM Investigation, Platform Manifold Maintenance, Spool Metrology and ROV Survey of Riser	Fugro 
2017	Hot-tap Project in the Bay of Biscay	Spain	Wrecks	Offshore	SAT diving, ROV Works	Hot-tap on tanks of 2 sunken wrecks and pumping remaining oil in order to prevent environmental loss	Maersk 
2017	Sat diving services monobuoy Cepsa	Spain	SBM	Offshore	SAT diving	Replace 2 Jumpers AND 2 Risers (2X5 UNITS), NDT Works and Pressure Testing Vessel name: Swordfish	CEPSA 
2017	GeoSea OWP Race Bank UK Sensor Poles	United Kingdom	Offshore Wind Farm	Offshore	Surface Supplied Diving	Installation of new sensors (inside and outside of a monopile)	GeoSea 
2017	Rosneft	Malaysia	PLEM	Offshore	SAT diving, Surface Supplied Diving	Manifold Replacement, spool metrology, spool installation	Rosneft 
2017	Samarang Project	Malaysia	Offshore Platform	Offshore	SAT diving, ROV Works	Installation of riser clamps, riser guards and flexible pipelines.	TechnipFMC 
						For more info please click here	
2017	Jangkrik FSU Installation	Indonesia	FSU	Offshore	Surface Supplied Diving	Diving Services for the provision of FPSO installation	Saipem 
2017	Diversion Water Alna River Oslo	Norway	Tunnel	Civil Works	Surface Supplied Diving	Diversion of water by installing pipelines into a tunnel and concrete in between weirs in order to prevent discharge into Follow Line tunnels	Condotte 
2016	Offshore Parenco IRM	United Kingdom	Offshore Platform	Offshore	ROV Works	General Visual Inspection, CP-Measurements Corrosion Protection Measurements by means of Proximity CP-equipment, FMD Inspections, Flooded Member Detection, Scour Surveys Inspection.	N-Sea 
2016	EPIC Project PLEM Valves and Subsea hose change-out	Red Sea	SBM/PLEM	Offshore	SAT diving	De-installation of PLEM Valves and Subsea hoses. Manufacturing of new valves and re-install (including subsea hoses).	PDOC 

DCN Diving Company Reference List

Following are some selected projects but the list is not limited to (click here to visit our website for more info):

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT
2016	Underwater Concrete Suez Canal	Egypt	Tunnel	Civil Works/ Inshore	Surface Supplied Diving	Dive Assistance for the provision of ventilations shafts for Ismailia tunnel under the Suez Canal. Work consisted of dredging, installation of shafts and underwater concreting.	JV Petrojet and Concord
2016	EPIC Project Roseires Dam	East-Africa	Dam	Hydro Power Dam	Surface Supplied Diving	Fabrication and installation of 250 T bulkhead (consisting of 18 sections) in front of hydropower water intake at 50 meters depth and rehabilitate intake	SHGC
						For more info please click here	
2014-2016	FCBC - Forth Crossing	Scotland	Bridge	Civil Works/ Inshore Diving	Surface Supplied Diving	Underwater concreting and subsea support for the construction of the foundations of the new cable-stayed bridge being built to replace the Forth Road Crossing. The bridge is 2.7km long.	FCBC
2016	Airlift Dredging	Austria	Dam Reservoir	Inshore		Manufacturing of airlift dredger and dredge at depths of 80 meter.	TIWAG
2016	Boerenwetering	The Netherlands	Canal	Inshore	Surface Supplied Diving	Inshore diving work for the provision of constructing Boerenwetering garage under the canal. The activities included: UW inspection, injection, installation grout bags, underwater concreting.	Max Bögl
2015 & 2016	Godewind 1 + 2	Germany	Offshore Wind farm	Offshore	ROV Works & Surface Supplied Diving	Grouting Hose Removals on Godewind 1&2 OWF Cutting and Removal of grouting hoses on 97 structures. Cable Protection Systems Surveys. Surveys of Cable Protection Systems on Godewind 1&2 OWF monopiles, OSS & infield.	DONG energy
2015	Port of Zeebrugge	The Netherlands	Ship's Lock	Inshore	Surface Supplied Diving	Inspection and airlift work at various Ship's Locks.	Port of Zeebrugge
2015	Godewind 1 + 2	Germany	Offshore Wind farm	Offshore	ROV Works	Grouting Hose Removal Trials. Cutting and Removal of grouting hoses on structures.	GeoSea NV
2015	EPIC Project Jakarta, Gas Pipeline Repair	Indonesia	Gas Pipeline	Offshore	SAT diving, hyperbaric testing, ROV Works	EPIC Project with the following phases: Pre-Engineering: Gather survey data, including pipeline ovality check, removal of concrete en taking sediment samples. Engineering: Developing procedures (including for welding related) Hyperbaric Trials: Diver and welding procedure qualification in the DCN Hyperbaric Center Offshore: Permanent repair of a subsea 'live' gas pipeline by welding a stand-off sleeve with the use of a habitat.	PGN

your subsea service provider

Following are some selected projects but the list is not limited to (click here to visit our website for more info):

YEAR	PROJECT	LOCATION	STRUCTURE	BUSINESS UNIT	DISCIPLINE	DESCRIPTION	CLIENT
2015	Belle Greve Outfalls Project	United Kingdom	Pipelines	Offshore	Nitrox Diving	Diving services, during offshore pipelay and installation pipeline diffusers.	Van Oord offshore
2014 & 2015	VO Gabon	Gabon	Pipelines	Inshore	ROV Works	Gamba export sea-line replacement project Pipeline Surveys & FPSO Mooring system installation. Diver assists. Buoyancy Cutting Assists.	Van Oord offshore
2014	OWP Baltic II and OWP Amrunbank	Germany	Offshore Wind Farm	Offshore	Surface Supplied Diving	Contingency contract for quick diving intervention.	Siem Offshore
2014	Cofferdam Installation and Weld Repair	China Sea	Offshore Platform	Offshore	Surface Supplied Diving, Cofferdam	Installation of a specifically engineered cofferdam, which installed on a damaged leg of an offshore platform. After installation, repair welds are performed with surface welders.	COOEC & CNOOC
2014	OWP Riffgrund	Germany	Offshore Wind Farm	Offshore	Surface Supplied Diving & ROV	Connecting earthing cables, removal of hydraulic hoses and installation of sonar provision.	GeoSea NV
2014	OWP Butendiek	Germany	Offshore Wind Farm	Offshore	Surface Supplied Diving & ROV	Design, supply and installation of 160 messenger wires and installation of 3 sonar provisions.	Ballast Nedam Special Projects
2014	Drinking water pipeline Texel - Den Helder	The Netherlands	Pipelines	Offshore	Surface Supplied Diving	Repair of the drinking water pipeline between Den Helder and the island Texel.	JV A.Hak and De Vries en vd Wiel
2013 & 2014	Basra	Iraq	Salvage	Offshore	Surface Supplied Diving	Salvage of several wrecks on board the Norma. Using Surface Supplied Diving techniques.	Svitser
2014-2016	Moervaartkaai	Belgium	Quay wall	Inshore	Surface Supplied Diving	Installation of a new harbour quay. Activities include: Installing Cofferdam, Welding, Injection, Drilling.	HYE
2013	Sharjah	United Arab Emirates	Pipelines	Offshore	SAT diving	Provision of diving and technical crew for the installation of subsea spool piece on board the DSV Seafalcon.	OMC Ship management LLC
2013	S-Oil	South - Korea	Pipelines	Offshore	Surface Supplied Diving	Installation of new SPM, PLEM and pipeline.	Van Oord
2013	Okpoho-Okono 16" Offshore pipeline	Nigeria	Pipelines	Offshore	SAT diving	Installation of new SPM, PLEM and pipeline.	STG -West African Ventures
2013	Duddon Sands	United Kingdom	Offshore Wind Farm	Offshore	ROV Works	Cutting 2 and 3" Subsea grout cables and hydraulic line with ROV.	Scaldis
2013	Shalung offshore crude oil pipeline	Taiwan	Pipelines	Offshore	Surface Supplied Diving	Cut old pipeline in section and services Installation of new SPM, PLEM and pipeline.	Van Oord
2013	GDF Suez coolwater intake lines	Germany	Coolingwater intakes	Offshore	Surface Supplied Diving & ROV	Cleaning of coolwater intake line with movable habitats. Horizontal penetration up to 600m at 24m waterdepth and 2m underneath seabed. Pipeline inspection 250 meters inside pipeline visual inspection of connections, multi-beam surveys of cooling water intake.	Arge C122
